

PUBLIC SALES AND SOLICITATIONS IN THE SCHOOLS

Policy 850
Page 1 of 1

Solicitation of funds from teachers and other employees of the district by any group, organization or individual, is not permitted in the schools unless authorized in advance by the superintendent.

Financial drives by non-school organizations involving the students shall not be permitted in the schools. The Board is cognizant of the many worthwhile welfare organizations and the fine work that many of them accomplish. However, the Board feels that such activities are better handled by and through other community agencies and that the public schools should not be used for these purposes.

No non-school organization or individual shall use school premises for the sale of goods or services or the promotion of contests or other events without first obtaining approval from the superintendent.
