

FACILITIES PLANNING

The Board is cognizant of its responsibility to the electorate and children in this school district to provide an effective educational program. Necessary in carrying out this responsibility is the need for adequate and modern physical facilities to enable staff to do a good job.

It is the goal of the Board of Education to maintain a continuous, ongoing program of facility improvement, maintenance, and expansion to meet the continuing expectations and demands of education, the community, and society in general.

The Board realizes that to provide adequate facilities for the total educational program requires planning for the present, the immediate future and the distant future, based on existing and future anticipated needs. To accomplish this, the Board shall devise a long-range facilities need plan which shall form the basis for continuously providing modern and up-to-date physical facilities.

When the Board decides to proceed with the building project as part of the district's Long-Range Facilities Need Plan, the project planning shall involve individuals or organizations and agencies that can contribute to the effectiveness and success of the project. In addition to professional district staff, this may include: professional consultants, architects, school attorney, members of and organizations in the community, and various local, state and federal governmental agencies.

The School District shall not discriminate in the planning of facilities on the basis of sex, race, national origin, ancestry, religion, color, creed, pregnancy, marital or parental status, sexual orientation, or physical, mental, emotional, or learning disability.

Discrimination complaints shall be processed in accordance with established procedures.
