

SCHOOL DISTRICT GOALS

It is the intention of the Mineral Point Board to set district goals which are to be reviewed annually at the regular October school board meeting. These goals should be set with the assistance of the superintendent and school district administration; however, they are intended to reflect the ideas of the school board members as they are agreed to each year. These goals can address either short or long range plans and can include any function of the school district including, but not limited to, finance, personnel, curriculum, building and grounds, and communication.

Adopted: December 1986

Revised: May 2000
